

PALESTINE SABOTEERS DESTROY TEN BRIDGES

**Bloodhounds Trace Extremists to Dead Sea Village
—Police Arrest All in Town—Four
Killed, 14 Hurt**

Jerusalem, June 17.—Unarmed Jewish extremists using automatic weapons, land mines and bombs blew up 10 bridges along the Palestine-Transjordan frontier during the night in a co-ordinated attack, it was announced officially today.

At least four persons were known dead and 14 seriously injured in the latest Jewish underground attack and an unrelated Arab-British clash.

Arrest Whole Village
The entire population of the Jewish settlement of Both Havara was reported arrested by Palestine police early today. A reliable report said dogs led the police from the village to the small collective settlement on the Dead Sea shore. It was understood a British army unit surrounded the village and carried out a complete search.

Some residents apparently offered "passive resistance," resulting in a minor clash in which two Jews were injured. All persons, except the village were reported brought to a prison here for further investigation. The village near Jericho had a population of about 300.

Palestine Authorities and King Abdullah of Transjordan mobilized their forces in a pursuit of the saboteurs. It was reported that the British army unit, the 1st Arab Legion of Transjordan, joined the search for the saboteurs. The British army unit, the 1st Arab Legion of Transjordan, joined the search for the saboteurs. The British army unit, the 1st Arab Legion of Transjordan, joined the search for the saboteurs.

At the famous Allenby bridge across the River Jordan near the Dead Sea, 20 Jews fought police for a half hour before they were able to blast the span. Under heavy fire the extremists waded into the water and attached explosives to girders. A nearby frontier control post collapsed, injuring three persons and a Bedouin was stabbed during the fight. The bridge was blown 11 hours after it was captured by the extremists.

High civil and military authorities met for three hours this morning to discuss the possibility of a possible widespread outbreak of terrorism.

Country Isolated
The blown bridges virtually isolated the newly-independent country of Transjordan, east of the river, just a few hours before ceremonies in Amman celebrating its treaty with Britain.

Two explosions, one of them near the British military base at midday, simultaneously with the bridge attacks. These explosions also were reported by the British military base at midday.

In an unrelated incident, but indicative of the unquiet in the area, two British soldiers were shot at a street clash between Arabs and British troops in the Southern Palestine. Two British soldiers and several Arabs were wounded seriously. The clash

**1,000 JEWS ENTERING POLAND
KILLED BY OUTLAW BANDITS**

Warsaw, June 17.—(AP)—Thousands of Jews being repatriated from Russia are fleeing westward and southward to escape intermittent waves of anti-Semitic terror at the hands of outlaw bands.

Approximately 1,000 Jewish slayings have been verified in the last 10 months and the toll is being boosted by bandit attacks in the Polish border regions where repatriation convoys operating on railways and highways.

The government is severely punishing those perpetrating anti-Semitic acts, but the activities of the lawless bands is so widespread it is difficult to assure adequate protection for all.

A total of 60,000 Jews is expected to be repatriated from Russia by Aug. 1, according to Polish government figures. The repatriation is being carried out by the Polish government.

The government is severely punishing those perpetrating anti-Semitic acts, but the activities of the lawless bands is so widespread it is difficult to assure adequate protection for all.

**THAMES MAY BE
THE ATOM RIVER**

London, June 17.—(CP)—The ministry of works may use 1,000,000 gallons of Thames river water daily to start research laboratories at Harwell. The Thames conservators agreed today, if the water is not radio-active when returned to the stream.

Approving a land drainage commission report, the conservators announced that the ministry refer to the effluent as "purified" and it is assumed that this designation includes freedom from radio-active properties which, it is understood, are likely to be very pronounced when returned to the stream.

Approximately 50 tonnage permits daily are being issued to allow the use of the Thames to proceed through the U.S. zone of Germany into France. Thousands are reported stranded in France because of difficulties encountered in proceeding to the U.S. and Palestine.

**Find Torn Clothes of Woman
Investigate Mystery At Oakville**

Special to The Star
Oakville, June 17.—(AP)—The discovery of a woman's torn clothes on the shore of Lake Erie yesterday morning led to the chief constable. He and Const. Alex Jackson, O.P.P., investigated.

Those of a woman "maybe 7 or 18 years of age" were found on the shore of Lake Erie yesterday morning. The clothes were found on the shore of Lake Erie yesterday morning. The clothes were found on the shore of Lake Erie yesterday morning.

**CHINESE ROLLING-PIN
DRIVES ROBBERS OFF**

Simcoe, Ont., June 17.—(CP)—Police Chief Arthur Bowman of nearby Waterford yesterday was investigating an attempted robbery in the cafe operated by Yung Lee and his wife. The alleged robbery was frustrated when Mah hit one of two men with a rolling pin, and both fled in a taxi which had been hired in Simcoe.

The driver of the cab said the two men got out a short distance north of Simcoe, and he returned to his office without any knowledge of the restaurant incident.

STORM KILLS TWO IN CHATHAM AREA DAMAGE \$1,000,000

Special to The Star

Chatham, June 17.—Tornado-like force of the worst electric storm to hit Kent county in a score of years left untold damage in its wake today. Wind like hail and lightning

ravaged the district over a 10-hour period, uprooted hundreds of trees, damaged store-fronts, inundated nearly half the country's farm land and took a toll of two lives.

At Windsor, three babies were born by emergency lighting two by flashlight, when the power supply failed in hospitals.

At McEwen, near Windsor, the steeple was ripped off the Roman Catholic church, holes were torn in the roof and a roof recently built at the rectory was completely gone.

Numerous small craft were torn from their moorings along the Detroit river and piled up on shore.

At Erieau, 20 miles north of Chatham, over 100 feet of the dikes protecting the rich Erieau lands were washed away, and a loss of water flooded over the fields.

At Mitchell's Bay, 18 miles north of Chatham, the storm drove a telephone wire, made roads impassable and inundated Vann's Island, three miles off the mainland where two men were reported to have drowned yesterday afternoon.

Tells of Fatality
First indication of the double fatality came from Cecil Kilbrath, of Wallaceburg, who said he was proceeding up the channel shore five miles when he saw a motor boat. Realizing they were stalled, Kilbrath said he started to give them a tow, but the heavy sea was the craft upset. He immediately disappeared but the two men were seen at the water's surface.

The water at that point is about 100 feet deep and apparently the men did not swim.

Sgt. Frank Scott, provincial police officer at Erieau, drove 15 miles to Mitchell's Bay only to find that rough water in the channel and the fact that the men were seen at the water's surface.

Operations until daylight at least. At a late hour night might not indicate the identity of the drowned men had been found.

The British foreign office in London characterized the broadcast as "a part of the propaganda propaganda being used by both Jews and Arabs."

Say Jewish Have Miff
London, June 17.—The London Daily Express reported from Port Said today that the grand mufti of Jerusalem is believed to be about a British warship speeding down the Red sea toward Seydlitz.

The newspaper charged the navy with treating the search for the disappeared British warship as a "top priority" trip.

The Port Said dispatch suggested that the mufti is aboard the Vergo, a destroyer vessel kept secret to avoid difficulties.

Both telegraph and telephone wires were down and every available line was called up.

District Blacked Out
Nearly every village and town in the county was blacked out last night as scores of hydro and telephone poles buckled in the wind.

The flat cornland in the Tilbury district was almost completely inundated by the cloudburst which followed the start of the storm yesterday.

From action of the Tilbury fire department saved the buildings of the district were saved by being through an extensive program of training at several places in Europe.

Discuss Italy Today
Paris, June 17.—"Big Four" foreign ministers resumed today the task of writing an Italian peace treaty, and a U.S. source said success of the conference might hinge on the Russian attitude toward Trieste.

A close associate of James F. Byrnes, U.S. secretary of state, said the head of the U.S. delegation considered Trieste a "question of principle" and the secretary never compromised "with questions of principle."

Since the U.S. apparently will not budge from the stand Trieste must remain Italian, diplomatic observers anxiously awaited indications as to whether Russia would be willing to compromise on demands the U.S. would be forced to Yugo-Slavia.

A wave of optimism swept over the conference when the Russian representative agreed to the discussion of the Austrian problem. Much of this optimism was dispelled Sunday when Moscow launched a new offensive against "reactionaries and ministers of peace."

Austria stands third on the agenda behind Italy and the Balkan states. Secretary of State Byrnes and Ernest Bevin want to remove occupation forces

CONFERENCE AND SPORTS EDITION

**STOOGES OF MOSCOW
RULE POLAND—BOR**

Newark, N.J., June 17.—(AP)—Liaut-Gen. Tadeusz Komorowski (Gen. Bor), Polish army leader and hero of the Warsaw resistance during the war, said Sunday that Poland "is ruled by the stooges of Moscow" who, support by Soviet troops, have introduced a Communist regime against the will of the Polish people.

Denounce "Slander Campaign"
London, June 17.—(CP)—The Daily Express reported today a Red Star article terming a "campaign of slander against Poland and the U.S.S.R." the American visit of Liaut-Gen. Komorowski.

The purpose of the campaign, the newspaper declared, "is to create a false picture of the Polish people and their government."

He told his audience that he resigned last January so as not to prejudice in any way the drafting of a new constitution.

He gave no indication of any intention to return to public life, although some observers said the speech was the opening shot in a campaign for an eventual political comeback. He has been suggested as president, if a constitution along the lines he suggests is adopted.

**U.S. BUILDING PEACE ARMY
OF 50,000 IN EUROPE—N.B.C.**

New York, June 17.—The N.B.C. reported from Paris today U.S. officers in Europe were building a force of 50,000 men to enforce future peace treaties. The report said the force would be composed of U.S. troops and would be trained at several places in Europe.

**TEHERAN TELLS SOVIET
BRITAIN FLYING ARMS**

London, June 17.—Moscow radio quoted Teheran newspaper reports said yesterday that Britain had been flying arms into Persia from the northwest.

The report said that a month ago a British plane had been shot down in the Persian Gulf. It added that the British government had been flying arms into Persia from the northwest.

ROY NAMED MILITARY BISHOP
Ottawa, June 17.—(CP)—Most Rev. M. Roy, O.P.E., Roman Catholic bishop of the Diocese of Montreal, has been named military bishop for Canada, succeeding Bishop C. Neill, retired bishop of Pembroke, Ont., it was learned today.

**THE WEATHER
MONDAY-TUESDAY**
The Toronto and vicinity forecast is: Cloudy; showers and thunderstorms this evening and tonight, becoming cooler. Tuesday, clearing and cool.

Temperatures yesterday and today: Max yesterday, 61, or average. Highest yesterday, 71.8 p.m. 18. Lowest yesterday at 5.30 a.m. 52. Lowest this morning up to 8 a.m. 53.0.

SEEK TORNADO BODIES IN RUINS OF HOMES

**Fear Toll to Rise as Search Continues, Hampered by
Floods—Terrifying Funnel Sucked Every-
thing Into Fatal Grip**

Detroit, June 18.—Police, estimating that at least 20 persons were killed, today directed scores of volunteers searching tornado-razed ruins of more than 100 homes on the outskirts of Detroit and Windsor.

Seventeen bodies had been recovered. Thirteen were in morgues on the Canadian side of the border, and there were four dead on the U.S. side. Police believed the toll would rise as the search continued.

The number of injured receiving treatment in Detroit and Windsor hospitals was estimated in excess of 150, many critical.

Hundreds Homeless
Property damage was expected to run into the millions of dollars in the Detroit-Windsor area. Hundreds of persons were homeless as the wind toppled trees and blew away many shingles. More than 100 homes on the Canadian side and 300 damaged on the Detroit side. Windsor was still paralyzed by lack of power.

Many of the victims were decapitated, the Canadian Press said, telling of a photographer who lifted a sheet in a morgue and found a headless body.

Further damage, estimated at \$3,000,000, was caused by floods in the flat lands of Kent and Essex counties. Water in places three feet deep rolled over the level floor, flooded houses and highways, following about 36 hours of nearly continuous rain. Crops suffered, most heavily were tomatoes, corn, potatoes and sugar beets.

The official weather report says 1.4 inches of rain fell in Chatham and still night. This figure is unequalled in recent history.

The entire area was cut off as communication wires were strung down. Telephone operators at Windsor were still accepting only high priority telephone calls this afternoon and said that because there were only three lines operating, even priority calls were subject to "cutting" if more than two were made.

The tornado, which weather bureau officials said travelled more than 50 miles at an average speed of 40 m.p.h., followed the business district of Windsor, leaving a trail of destruction.

It then zoomed across the Detroit river, the suction of the funnel creating four huge waterpots. U.S. coast guardmen said that as they knew, no boats had been damaged. After hitting Ontario, it blew itself out on Lake St. Clair.

The terrifying funnel, estimated variously at from 30 to 100 feet at its base, sucked nearly everything in a 100-yard swath into its

(Continued on Page 2, Col. 6)

BLAST HAIFA PORT, 18 DE SABOTEURS KIDNAP BRITONS

Jerusalem, June 18.—Fifteen British officers were kidnapped at Tel Aviv today and an attempt was made to assassinate two Britons in Jerusalem as casualties in three days of Holy Land violence mounted to at least 18 dead and 30 wounded.

The officers were kidnapped "in an official" manner, British sources suggested they were seized as hostages for two members of the "Stern gang" of extremists, whom a military court sentenced to death.

The kidnapping was armed with tommy-guns.

The dining room in the Yarkon hotel was filled with British officers. Police said young Jews crowded off the building and threatened to force them in the lobby. They beat them and forced them at gunpoint to leave the hotel.

Set Off "Scare Bomb"
Hundreds of passengers aboard by hapless and watched the officers their hands raised, enter a small car which sped away to the north. When an army jeep approached a few minutes later, a "scare bomb" was set off in the road to discourage pursuit.

Names of the kidnapped officers were not disclosed.

Another British officer and a British soldier were attacked on King George Ave. and the soldier was killed. Both were reported wounded seriously.

The kidnappers have sent a message to the commander at Tel Aviv warning that the five will be executed unless a death sentence is agreed to by the British government.

The British commander immediately dispatched the sixth airborne division and flying squad of police, aided by armoured cars and tanks, to surround the surrounding countryside. Hal's Palestine's key leader, Yehoshua, was captured last night by 1500 soldiers and was taken to a military camp.

An official announcement said nine Jews were killed and 11 others, including three women, were wounded. The women were members of the raiding party, seriously injured during a gun battle with British troops in the shattered shops.

Explosions continued for an hour. Fourteen men and a woman were arrested. The woman, arrested in a taxi, had a bullet wound in her chest.

There staged a three-hour strike in Haifa and Jerusalem, while thousands attended funeral services for the slain.

Haifa's harbor area is littered with shattered pieces of wrecked locomotives and trucks.

During the night a heavy hand bomb was exploded on the tracks of the Haifa-Lod railway near

SUBURBAN WINDSOR HOMES REDUCED TO RUINS

PICK THEIR WAY THROUGH HOME BLOWN TO PIECES BY TORNADO

3 MEN TRAPPED EGLIE TOPPLES IN MINE SHAFT

Metropolitan Hospital, Windsor, admitted 30 men today who were seriously injured when Mrs. Edith Lambden, 28, and daughters Nancy, seven, and Gloria, 15, Mrs. Stella Konotaki, Joseph Clark, Mrs. Ethel Lake, Mrs. Deena Borden, Mrs. Newton Shilley, Mrs. Duggan, Mrs. and Mr. Raymond Fox, William Journeau, 40, of Centerville, Mich., electrocuted while repairing storm-damaged wires.

Jean Bart, age unknown, died at Wyandotte General Hospital, Detroit, after being struck by the storm.

Mrs. Charles Garrett, 60, Rochester, Mich., lost her life when she was swept from her porch by floods after a dam broke near her home.

INJURED
Metropolitan Hospital, Windsor, admitted 30 men today who were seriously injured when Mrs. Edith Lambden, 28, and daughters Nancy, seven, and Gloria, 15, Mrs. Stella Konotaki, Joseph Clark, Mrs. Ethel Lake, Mrs. Deena Borden, Mrs. Newton Shilley, Mrs. Duggan, Mrs. and Mr. Raymond Fox, William Journeau, 40, of Centerville, Mich., electrocuted while repairing storm-damaged wires.

At another place in the debris, Mrs. Molitor sought to place a ceiling on the total damages Italy might be required to pay to Allied nations for the loss of their property within Italy.

The last conference was held Tuesday, June 18.—First aid and timbermen are working feverishly today deep down in the mine shafts to free the trapped men.

At least three men were trapped early today when a locomotive plunged down on top of the mine cage.

The locomotive, an electrically operated engine, about the size of an auto, plunged down the shaft, carrying the operator with it. Due to the fact the cage is pinned under ground in the only entrance to the mine, the men have to go down by ropes and ladders.

At noon they had not yet reached the scene of the disaster and mine officials can give no indication of how long it will take to find out whether anyone is still alive.

Even after the cage is reached, timber and cribbing must be removed to reach those trapped.

**Firemen Save Two
In Burning House**

Kitchener, June 18.—(CP)—Mr. and Mrs. Ephraim Shaffer, age 75 and 73, of Kitchener, were saved from suffocation late last night by the quick action of a neighbor, Bert Widmeyer, and the promptness of the Kitchener fire department in answering his call.

They were found asleep in a smoke-filled apartment after Mr. Widmeyer sounded the alarm. He had seen a flash of fire through a window.

The firemen were battering down the door when Mr. Schaffer, 75, and Mrs. Shaffer, 73, were found in a room filled with smoke. Putnam finally found her in a back room and carried her to the fire escape.

The fire was thought caused by a short circuit in a floor lamp. As it left Chatham, fear was rampant that swollen creeks and dredge cuts would bring the water swirling through the city.

The force of the "cloudburst" was estimated for 15 minutes. I parked the car at the side

MOLE TOY CONCESSIONS SPEEDING BIG 4 WORK

Paris, June 18.—Willingness to compromise on small issues helped carry the Big Four ministers through their first two sessions in a new-found spirit of harmony.

Yesterday Molotov yielded several times when he found himself outvoted by the three western powers on relatively uncontroversial economic questions pertaining to the Italian treaty. Afterward he drank champagne and chatted with James F. Byrnes, Ernest Bevin and Georges Bidault.

Wants Italy's Goods
On the agenda for today's plenary session at 4 p.m. (11 a.m. EDT) are reparations, repatriation of Allied property by Italy, and economic and financial clauses affecting territories formerly occupied by Italy which have been ceded to the Allies.

American informants quoted Molotov as saying during the discussions that he wanted to make the burden on the Italian people as light as possible.

At another phase in the debate, Mr. Molotov sought to place a ceiling on the total damages Italy might be required to pay to Allied nations for the loss of their property within Italy.

The last conference was held Tuesday, June 18.—First aid and timbermen are working feverishly today deep down in the mine shafts to free the trapped men.

Kitchener, June 18.—(CP)—Mr. and Mrs. Ephraim Shaffer, age 75 and 73, of Kitchener, were saved from suffocation late last night by the quick action of a neighbor, Bert Widmeyer, and the promptness of the Kitchener fire department in answering his call.

They were found asleep in a smoke-filled apartment after Mr. Widmeyer sounded the alarm. He had seen a flash of fire through a window.

The firemen were battering down the door when Mr. Schaffer, 75, and Mrs. Shaffer, 73, were found in a room filled with smoke. Putnam finally found her in a back room and carried her to the fire escape.

The fire was thought caused by a short circuit in a floor lamp. As it left Chatham, fear was rampant that swollen creeks and dredge cuts would bring the water swirling through the city.

The force of the "cloudburst" was estimated for 15 minutes. I parked the car at the side

of the road while the driving rain blinded my vision beyond three feet.

All along No. 2 highway between Chatham and Tilbury, cars, trucks and buses were stalled in the deluge. At many points, the water was so deep that it was impossible to get through. A queue of eight large tractor transports was stuck at a snail's pace. A queue of eight large tractor transports was stuck at a snail's pace.

Truck drivers had halted at the side of the pavement to avoid driving with wind and rain. Violent gusts of lightning stabbed at the ground and struck a series of "chain" poles and strings of "chain" poles.

I made the return trip shortly after 12 o'clock and although flood water had risen in the fields, the road was fairly clear. At Tilbury, however, nearly all streets were under water, some thoroughfares covered to a depth of nearly two feet.

As I crawled along route No. 26, Windsor, the road was completely blocked with wind and rain. Violent gusts of lightning stabbed at the ground and struck a series of "chain" poles and strings of "chain" poles.

I made the return trip shortly after 12 o'clock and although flood water had risen in the fields, the road was fairly clear. At Tilbury, however, nearly all streets were under water, some thoroughfares covered to a depth of nearly two feet.

5-TON TRUCK LIKE KITE WHEN TWISTER GRABS IT

Man Sees Brother's Lorry Soar 75 Feet, Smash Into House, Killing Owner and Son—Four Other Occupants Injured

Special To The Star
Windsor, June 18.—"I saw my brother's five-ton truck lifted off the road 75 feet in the air and smash against his house 50 yards away. When I got to the house he and his three-year-old boy, Wallace, were dead in the basement. They were blown clear out of the truck."

This is how Henry Souliere described how he saw his 28-year-old brother, Ulysse, killed before his eyes. They lived opposite each other on Huron Rd., Sandwich West. Henry's trim green-roofed bungalow stands intact and untouched. His brother's, less than 100 yards away, caught the full blast of the tornado and is now nothing but a pile of rubble.

Four Others Injured
Mrs. Souliere, her two other children, Tommie, 4, and Ulysse, 12 months, and her niece, Madeline, 16, were also in the truck. Mrs. Souliere and the children are in Grace Hospital.

"It is a miracle that the youngest child was not killed," said R. Laliberte, a brother-in-law. "Because they had to lift a post off of him from above."

He said Mrs. Souliere's condition was fair today and the head of the family was recovering from the shock of her husband's death. The children are considered out of danger and Madeline has been released from hospital.

"My brother had just finished paying for his house," Henry Souliere said as he kicked a pile of plaster. A crowd had gathered under the lowering skies to express their sympathy. They looked at the twisted pile of metal which was all that remained of the truck which Ulysse Souliere used in his contracting business and which he cared for like a baby.

Says Lorry Bled All Night
"When the police going to look at the car," Mr. Souliere asked, "People have been looting my brother's possessions all night. When the alarm spread that the tornado was on its way Mr. Souliere

lifted the truck like a kite."

**HAMILTON BOY FACES
FOUR ARSON CHARGES**

Hamilton, Ont., June 18.—A 16-year-old Hamilton student today appeared in magistrate's court on four charges of arson and was remanded until June 23. Police said the charges were laid against him after he was found with a matchbox at a home and at the Queen Victoria school.

Victor Brown, 34, of Toronto, today was committed for trial on charges of holding up the staff of the bank at Carleton Place, Ont., and taking \$783. Brown was arrested in the bank.

Three masked men entered the Carleton bank, forced the staff to the floor and then, grabbed the money and fled.

More said he had piled his family into his car and swung on to the highway opposite his brother's home while his wife and Madeline and my brother started up the truck and put the baby in the cab while his wife and Madeline scrambled in. I drove up the road a little way and turned around just in time to see the tornado lift the truck like a kite."

**CHRYSLER WORKERS STRIKE
AT WINDSOR AND CHATHAM**

Windsor, Ont., June 18.—(CP)—Employees of the Chrysler Corporation of Canada Ltd., here and at Chatham, today went on strike and set up picket lines around the head office. The strikers are members of the United Automobile Workers (U.A.W.).

The clash of their two chiefs was the signal for what police said was a 10-minute free-for-all between over 200 picketers and a management force. It was broken up by police charges were laid.

"I swung first and then everybody cried out," he declared. "The Chrysler (Vanderpool) is supposed to have been a wrestler and he decided yesterday we were going to put a stop to it. We did that very effectively this morning."

Tells of Fight
Mr. Doherty said the fight, which occurred at 8:45 a.m. outside the plant, was caused when the management attempted to get strikebreakers into the factory. "The boys just not going to allow this strike to be broken until an agreement has been signed," he declared.

"We met them on the picket line and the general manager began calling me names and I took him up on it. He apparently doesn't like scabs and that's why I can't understand why he's so anxious to get them into the plant."

"I think perhaps this fight will bring things to a head a little faster," he continued, referring to negotiations to end the five-week strike. "They have been doing their hardest to bring in strike-breakers and we decided yesterday we were going to put a stop to it. We did that very effectively this morning."

None Hurt Badly
Chief Constable Hedges Padgett, who intervened along with four town constables, said: "They were using their fists. No one was hurt badly."

Mr. Doherty said his exchange with Mr. Vanderpool was not intended to affect negotiations. "Anyway, we want somebody here who can speak for the company," Mr. Vanderpool said. Mr. Evans are not qualified to speak for them because they have no authority to do business. That's why the strike isn't settled yet. We've decided yesterday we were going to put a stop to it. We did that very effectively this morning."

LAKE TEMPERATURES TODAY
Central Park 49
Cherry St. 48
Lundy Ave. 44

THE WEATHER
TUESDAY-WEDNESDAY
The Toronto and vicinity forecast: Clearing during the morning; foot the country. Clear; with light fog. Northern wind 20 m.p.h., decreasing to 15 m.p.h. on Wednesday.

DEFEAT LAND ACT PLAN
Ottawa, June 18.—(CP)—A proposal to amend the real estate law, which would allow the Veterans Land Act was defeated today by the Veterans Committee of the Commons.

SMALL ONES GET BREAK
Large sites are being reserved in Glasgow for the development of big factories, built with local government funds and leased in sections to small manufacturers. The aim is to develop light industries to give Glasgow a better-balanced economy and to avoid large scale unemployment.

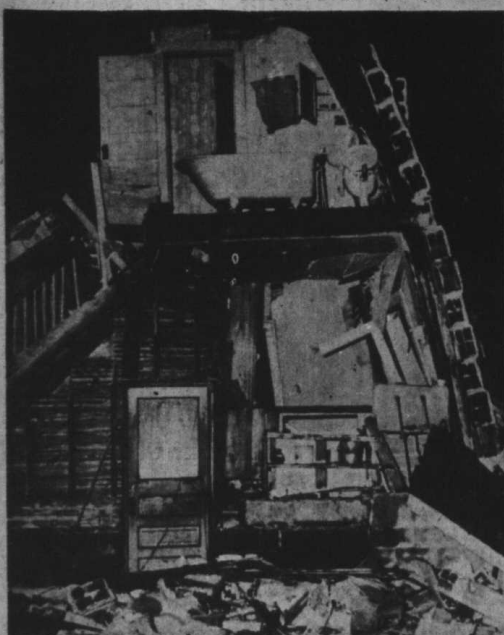

**Nabs Four Fish With Pitchfork
On Highway On Meatless Day**

Windsor, Ont., June 18.—(CP)—Edward Thurman went fishing with a pitchfork on one of the province's busiest highways today, and for his meekness Tuesday he had four carp.

Edward, a Negro, grinned a happy grin as a reporter's car drew to a stop beside his fishing spot on No. 2 highway, a short distance west of Windsor's city airport. Proudly he waved his pitchfork in the air.

With a five-pound fish impaled on it. "Get three more like this up at the house," he said.

Edward wasn't sure where the fish were coming from, and he's been particularly to care. All he knew was that water was running deep and that the fish were there. The fish were filled and fish were abundant. Maybe they're coming from that 'crick back there,' he said.

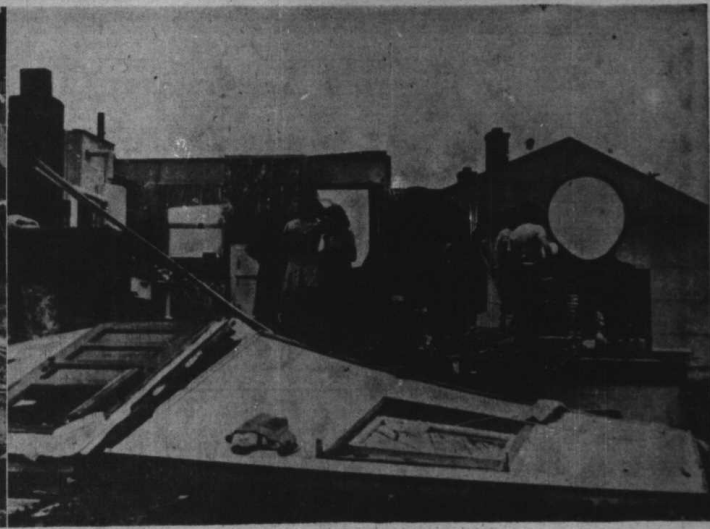

FREAK WRECKAGE marks the path of the twister that brought death and destruction to the Windsor district. This residence of Arthur Potvin was sliced in two by the tornado which also caused damage to some parts of Detroit

OVER A MILLION DOLLARS damage has been done to the Erieau onion fields by flood waters when a dike on Rondeau bay, protecting the marches, collapsed Sunday after heavy rains. Further damage occurred last night and today as the

downpour continued at the rate of three-tenths of an inch an hour. Farms were isolated and the onion crop, which supplies 50 per cent. of Ontario onions, is completely destroyed. This was a week-end of destruction

THE SUBURBAN AREAS of both Windsor and Detroit bore the brunt of the tornado. Windsor's electric power was cut off and lights, radios, electric stoves and other household appliances are useless. Only high priority telephone calls are coming from the area. This is all that remains of a home, a truck and an automobile thrown together on the Huron line highway

ALL FOUR WALLS of the home of an unidentified family were neatly knocked down by the tornado. In the Windsor area, it is estimated that at least 100 homes were destroyed and 300 damaged. A housing project outside River Rouge was wrecked. Trains were blown off the track and freight cars were hurled high in the air by tornado

100 FAMILIES ARE HOMELESS ERIEAU DAMAGE IN MILLIONS

Special to The Star

Blenheim, June 18—Spending its final fury over 1,700 acres of the Erieau onion marshes, 70 miles west of here, the tail end of the Windsor tornado today had left nearly 100 families homeless and caused a crop and property loss that runs into millions.

Second Storm in 24 Hours

Accompanied by a terrific rain-storm and a roar of thunder that rent the heavens for miles about, the dying twister gave the hard-working onion growers a double dose of trouble. In the farm lands of Essex and Kent counties it brought no casualties. But the floods it caused drove the onion growers from their homes in canoes, rowboats and launches for the second time in 24 hours.

Sunday night many of them had to clear out in a big storm. Last night, about 10 o'clock, they were again getting settled when the heavens broke loose.

"I have been around here all my life and we have had plenty of storms off old Lake Erie, but never did we have anything that tied this one," said William Colliart who lives on the heights overlooking the marsh. "The mayor of Colliart Heights," as he is known, explained he was alone at home when the willow tree went."

Smashed Like Matchwood

A landmark on the heights and about 60 feet tall, the willow was smashed like matchwood. "That gave me a scare," Colliart

went on, "but the flooding was more frightening. There is a little gully on the heights and in no time it was a roaring torrent. The water swirled about seven feet over the small bridge and remember, this is on top of the heights."

With daybreak Colliart surveyed the ruins below. At least 35 homes were flooded and in most of them the water was five feet deep in the bedrooms. Bars all around were flattened and telephone and hydro lines twisted. Perched up a tree at a crazy angle he saw a tobacco planter, carried at least a quarter of a mile.

Rescued Second Time

During the storm the onion growers had manned the boats again. For the second time rescuers arrived to take Edward Sroch and his bride of two weeks off the roof of their new cottage near the lake front.

Again they called on the families of Hector Vermeesch, Gus Host, Frank Rogalla, Paul Tistick. The families of John Yarnick and Cyril Vertradi paddled away in canoes and they took just as bad a soaking as did Frank Sroch, Phil Tim-

skenko, Peter Chudi and Mike Hobbs. Years ago these onion lands belonged to the ducks and they fell like giving it back to them. Gone were their crops of onions, tobacco, strawberries and celery.

Today they were without lights or telephone service and the pump houses that clear the marsh after ordinary storms were useless. They were marooned in acres and acres of water and not a drop of it was fit to drink.

SOUND-ON-FILM PROJECTOR

Now! DEVRY 16mm.

PRECISION-QUALITY BUILT

It's here in enough high quality electronic equipment that will enable you to make the most effective use of both sound and silent motion pictures. The compact, efficient projector is housed in a big, very pleasing case. Another new feature: the 16mm sound film is mounted inside the projector and is completely protected from dust and damage. The projector is so simple to operate that you can be up and running in a few minutes. You'll find this projector in a lot of places, but only one place where you can get it for less than \$729.00.

FILMS! \$729.00

Price Photo Supplies has a complete line of films in a full size of 16mm, 8mm, 35mm, 65mm, 100mm, 150mm, 200mm, 250mm, 300mm, 350mm, 400mm, 450mm, 500mm, 550mm, 600mm, 650mm, 700mm, 750mm, 800mm, Side of Street Just Vanished Says Twister Witness

SURVIVOR OF THE twister which hit the Windsor district, Raymond Fox, head dazed Ojibway resident who was searching for his home, his wife, Dorothy, and his daughter, Donna Marie, two, is consoled by Rev. Charles Brown. The child was killed.

WHEN THE TORNADO hit Windsor and Detroit, houses and buildings were ripped apart by the terrific wind. In River Rouge, small town near Detroit, Grace Baptist church was totally destroyed by the tornado. This is all that is left of the building which collapsed. River Rouge was among the first areas to get the full force of the storm which flattened a housing project in one spot. Stores on the main street fell under the impact of the wind.

SEARCHING AMONG THE RUINS of homes in the River Rouge district, firemen were seeking the bodies of missing persons. In Detroit proper, little harm was done by the wind, the only damage resulting from the heavy rain which followed. After sweeping through River Rouge, the tornado crossed the Detroit river to Windsor, raising water spouts as it went. Spectators told of railway cars being tossed about like toys by the force of the tornado.

AFTER THE STORM had passed River Rouge, spectators ventured into the streets to view the damage. Here is the scene in the business district where stores and buildings were shattered. A U.S. government warehouse was wrecked, dumping bombs into the river.

HALF STREET RAZED, HALF UNHURT WAS 'PETRIFIED,' SAYS TORONTO MAN

By WESLEY HICKS
The tornado which devastated western Ontario last night swept within 50 yards of Albert Rosen, a Toronto youth, and left him unharmed. Rosen stood petrified while the spiralling death wind ripped up one side of Tecumseh St. on the outskirts of Windsor and spun away two miles where it seemed to disappear into the sky.

Albert Rosen went to Windsor with some friends Sunday, June 16, to buy a camera. He and his friends were to rendezvous at a cafe on Tecumseh St. on Monday evening, but after waiting for some time for them, Rosen became impatient and accepted a ride from a truck driver who was driving back to Toronto.

"About 7:30, Monday evening, we were driving past the corner of Tecumseh St. when we noticed everything looking up in the air," Rosen said. "We stopped the truck and got out. At first I couldn't see anything, but we were frightened because there was a strange feeling in the air. Then I saw what looked like a

pure white spiralling cloud coming toward us. It was cone-shaped and about a mile high. It went right up into the clouds, and it was moving very fast, spinning and twisting. It came from the American side, but now I don't know which direction it was going because I had never been in Windsor before.

"I was more frightened than I have ever been in my life and I wanted to run, but, so help me, I couldn't. I was petrified.

"Then, before I could even think of moving, the tornado struck Tecumseh St. I saw six houses go straight up in the air. They were just torn right off their foundations and went straight up. I swear they disappeared. It was terrifying. The only thing left standing all along the one side of that street was the wall of one of the houses. There was a woman dead in there.

3 WORKING IN PIT BURNED BY FLAMES

Special to The Star
St. Thomas, June 18.—Ronald Watts, 28, and Victor Gallbreath, 25, were severely burned today in a repair pit at the Elgin Bus Company here when an electric wire short-circuited, causing gasoline to ignite.

A third man in the pit, Art Moore, escaped with superficial burns. Watts and Gallbreath are in the Memorial hospital with bad face and arm burns.

Alplane circling near the tornado as it swept towards him. "It looked like a passenger plane. It was a big two-motored job and looked like an airplane plane. But I lost sight of it in the excitement. I don't know what happened to it." (No passenger planes are unaccounted for, T.C.A. said.)

Rosen says there were scores of injured on Tecumseh St. He says he lost count. The truck in which he was riding became entangled in a traffic snarl and he began directing traffic to try to release it. Workers in the vicinity plunged into the tangle of fallen trees and wires to extricate the injured and Rosen helped them into cars where they could rest.

"About half an hour after Tecumseh St. was hit," Rosen says, "city buses from Windsor arrived and began to take the injured into the hospitals. I helped them from the cars and into the buses until that job was done and then I started to direct traffic.

"The tornado itself had spun about two miles away and just stayed in one spot for about 15 minutes, twisting and twisting. Then it seemed to go straight up in the air and sort of dissolve into a cloud. It just went straight up and sort of boiled around in the sky and then softened out."

About 10 o'clock, two and a half hours after he had alighted from the truck to see why people were staring up into the sky, Albert Rosen resumed journey back to Toronto. The first thing we saw," he says, "when we started along the road, were box cars strewn all over

HOT AIR AND COLD GET STORM BLAME

Detroit, June 18.—U.S. government meteorologists said yesterday's Windsor-Detroit tornado and thunderstorms over a wide area, were caused by "interaction between moist, hot air and a mass of cold air which forced its way out of south central Canada." They said the storm area did not stop to examine it.

From Windsor to Chatham, Rosen says, the countryside is devastated by wind and water. "For 15 or 20 miles the other side of Chatham, the trees and poles are all down," he says, "and the fields are flooded. All night as we drove along, the lightning was flashing and the thunder raged."

In Chatham we were held up for three hours by a huge tree which had fallen right across the road. A car going in the opposite direction, had crashed into it. When I got out of the truck to investigate, the water was up to my knees. "We finally got out of Chatham, but not until it had been towed about 35 miles by another truck. The water had soaked our engine and we were stuck for hours. We arrived in Toronto at 6:45 this morning after going nearly 200 miles out of our way."

Rosen says a violent storm preceded the tornado. "I have never seen anything like it," he says. "The driver of the truck pulled up and we waited it out. It didn't last long—only about five minutes—but it was very bad. There were hailstones about the size of golf balls and they sounded like rocks when they bounced off the cab of the truck."

"That storm lasted only about five minutes, but there couldn't be a crop standing after that hail storm struck. It was only a few minutes after it stopped that we pulled out and started for Toronto. We hadn't gone for more than a few blocks when the tornado struck."

AS THE TORNADO passed through River Rouge business district it left this shattered theatre in its path. Velocity of the wind increased as it swept through the community and reached its full force by the time it struck Windsor on the opposite side of river.

SOVIET WRITER SAYS CANADA PUT IN DANGEROUS POSITION

Montreal, June 18.—(CP)—Belief that through the current espionage trials Canadians had been placed in a "dangerous position in the political war" against the Soviet Union, was expressed here last night by one of a party of three noted Russian writers visiting the Dominion.

When the question was raised at a dinner given the Russians by the Press-Radio branch of the Canadian Legion, Ilya Ehrenburg replied: "The point of view of my government was published in a declaration which was reported here. My point of view is that of an average Soviet citizen . . .

PICTURE OF LESCOT REMOVED IN HAITI

Port au Prince, Haiti, June 18.—(AP)—The Haitian Congress voted at its opening session yesterday to remove from the House picture gallery of Haiti's former presidents the photograph of former President Elie Lescot, deposed and deported in January by a military junta.

The audience attending the session cheered the decision wildly. Mr. Lescot, first elected president of Haiti in April, 1941, and re-elected in 1944, was forced out Jan. 15 after a day of demonstrations against him. Mr. Lescot reached Miami with his family three days later and now lives in Ayizier, Que.

'LIKE BOMBS BURSTING' SAW IT FROM SKY SEAT

Cleveland, June 18.—(AP)—Ray Milner, airline pilot, who first reported the tornado which cut through Sandwich in the city of Windsor, after striking at River Rouge, Mich., a Detroit suburb, declared early today that the "twister" covered the ground "with blue flashes."

Blipped Through Power Lines
Milner, who piloted a Pennsylvania Central Airlines ship carrying 23 passengers around the tornado en route from Detroit to Cleveland, said the "twister" was the "worst I have ever seen."

"It was ripping through power lines and the ground was covered with blue flashes like the pictures of bombs bursting," he said. "I could see it tumble buildings when it hit the ground, and it would pick up other objects and whirl them around."

The course of the P.C.A. airliner would have crossed the path of the tornado but Milner saw another thunderstorm and changed his course, he said. He turned the plane to the southwest before seeing the tornado on his left and notifying a United States weather bureau station at Detroit.

"The twister was moving with terrific speed," Milner said. "I have seen tornadoes in west Texas where we really have them, but this was the worst I have ever seen."

The cone stretched clear from the ground to the cloud base, about 2,500 or 3,000 feet up. It would hit the ground and dissipate, and then stretch down and hit the ground again, making whirlpools of the storm clouds close to the ground. It was twisting and curling all the time, and you could tell that it would destroy anything it hit.

"We had a warning of thunderstorm when we left Detroit, but I guess it was impossible to predict tornadoes. I warned our incoming night crew of their airfield, and the in-322,300.

FIRE SWEEPS GIGLI VILLA
Rome, June 18.—(AP)—Fire of undetermined origin swept through the villa of Gigli, opera singer, last night, destroying several million.

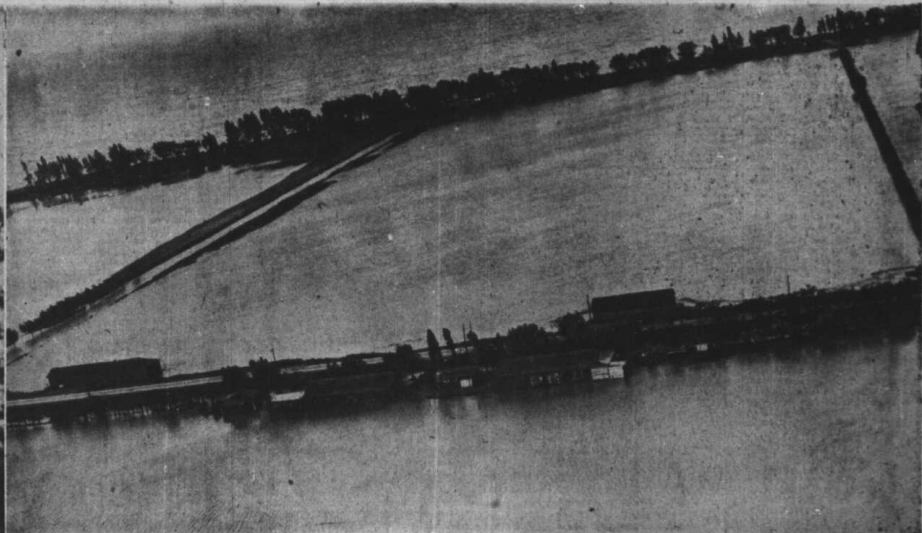

'Seemed to Have Long Thin Tail'
Says Bus Driver Who Saw Cloud

Special to The Star
London, Ont., June 18.—Nell Jolly, a Greyhound bus driver who pulled out of the Windsor tunnel just as the disastrous storm struck in River Rouge, saw it happen, but never dreamed of its calamitous proportions.

"When I picked up my passengers at Detroit at 8 o'clock, the skies were black and there was a terrific noisy thunderstorm," he said. "When I reached Windsor the sky was bright, and the rain had stopped. But the customers men and others were standing looking at an awesome thing in the southwest sky. The background was black and leaden, but against that showed a putty white funnel-shaped cloud. It rose up suddenly out of the Sandwich or West Windsor district and passed down south of the terminal. I thought, a mile away. It seemed to have a long, thin tail reaching down to the ground. It made no audible noise at that distance, but seemed to rise clear of the ground as if to miss the heart of the city. Then it dipped again to the earth. "As I drove out McDougall Ave. I saw the roof blown off a building. It was out in the street and near it in the gutter was a mangled bicycle. Along the M.C. railway I saw poles and wires down, but no great damage otherwise. The storm blew down and it rained hard again as we drove on through Tilbury and Chatham."

TWO OF THE BADLY injured survivors of the tornado which killed 20 and injured 150 persons when it hit the Detroit-Windsor area are Mr. and Mrs. George Bolyant, of Ojibway. Said Mr. Bolyant: "It's the luckiest thing in the world we are still alive."

PRECEDING THE DISASTER AT WINDSOR, heavy storms Sunday inundated the rich marsh land of Erieau, where onion crops were destroyed as two-thirds of the area was submerged. This aerial view indicates the extent of the flooding. The storm was felt as far as Windsor, Chatham and Kent county in general suffering heavily. Washout at Erieau came when dykes, holding back the lake water, gave way. Three persons died in the storm.

—A.P. Wirephoto
BY A FREAK OF THE TORNADO, this refrigerator alone survived intact when a suburban Windsor home was wrecked. Here, Charles Feita and members of his family attempt to salvage the ice box. The storm was described as a grisly black hand that scooped up houses and machinery in to the sky. Survivors said the wind was so hot it burned.

VICTIM OF THE TWISTER, an unidentified man is being lifted into a waiting ambulance. Driver of the ambulance said later that the patient died on the way to hospital. Caught in front of his home at Brighton beach, a cyclist, Casper Segrist, suffered injuries when blown 30 feet. His bicycle was found woven into a wire fence.

BESIDE THE WINDSOR-AMHERSTBURG highway, bodies of two tornado victims were found. Spectators tell of an automobile being blown 300 yards at another point in the storm area. Carl Adams of Sandwich said the storm resembled a huge cone "with leaves around the outside." The "leaves," he found, were parts of demolished buildings.

FIREMEN AND A FIRE TRUCK are on the scene where another body was found just off the main highway at Ojibway. At another point, the body of a little girl, stripped of clothing by the wind, was found in the underbrush. Her mother and brother also were killed and her father and two other brothers were seriously injured.

BODIES OF TORNADO VICTIMS are shown in the Windsor morgue where a nurse is trying to identify the dead. Buses were mobilized to rush injured persons to hospital from the stricken areas. A woman told of seeing a house lifted from its foundations with its seven occupants. "I saw the bodies being carried away by the wind," she said.

CHIEF CORONER FOR ESSEX COUNTY, Dr. C. V. Miles checks the identity of a body placed in the back of a truck. The body was that of Waldo Beaman, Ojibway automotive worker. In the Brighton beach area, a woman who saw the storm coming saved her three children. She put them in a ditch and threw herself over them just before the wind hit.

"PIPE SMOKERS! ASK FOR OGDEN'S CUT PLUG."

COMPLETELY SURROUNDED BY WATER is this dwelling in a grove of trees seen from the air along the Blenheim road. In places the flood waters rose to a depth of three feet, rolling across level fields and highways following almost 36 hours of continuous rain. Heavy rains and floods added to the misery of tornado homeless

"It often happens that a motorist will arrive on an overnight parking session with the intention of leaving before 7 a.m. Such a service will now be permitted to service the car brought in for parking overnight," Mr. Daley said.

Brantford is expected to follow Toronto's course in the restricted hours and a conference at Brantford for the purpose of considering similar regulations has been authorized by the minister.

"I have an order in my pocket to appear in court Thursday to be committed to jail," he threatened in a statement in an earlier report by Mr. Justice Barlow on June 6, said by George McTaggart, Fleet Station operator, when he heard Mr. Daley's announcement.

Disability Insurance *Direct at Cost*

You don't have to fall into a barbecue pit or be bitten by a rattlesnake this summer to collect benefits from The Commercial Travelers. You are protected day and night, at work and at play, at home and on trips. No jokers, no trick clauses, no red tape.

You can enjoy the pleasures of summer with the knowledge that you are protected against the financial hardship of disability during the season when most accidents happen—while at work, at home, in traffic, in camp, in sports events.

If you are a man between 18 and 54, engaged in almost any "white collar" occupation, you are probably eligible to enjoy your choice of the accident, health and hospital plans with which this 65-year-old company serves its 220,000 carefully selected members.

Once you become a member, there is no age limit for accident insurance except for a reduction of the death benefit at age 70; health and hospitalization benefits cease at age 65.

Here's What You Get
Choice of plans to fit your needs:

\$25 or \$50 WEEKLY for **TIME LOST** through injury by accidental means... payable from the first day every 30 days for as many as 104 weeks... as much as \$2,600 under the single or \$5,200 under the double plan for any one mishap. No limit to number of mishaps.

\$12.50 or \$25.00 WEEKLY up to 26 weeks for partial disability similarly caused.

\$5,000 or \$10,000 for **LOSS OF LIFE, limbs or sight** by accidental means.

\$25 WEEKLY for **SICKNESS** causing confining total disability, payable after the first 10 days every 30 days up to 52 weeks . . . up to \$1,300 for any one confining sickness. No limit to number of separate sicknesses covered.

\$12.50 WEEKLY up to 26 weeks for non-confining total disability caused by sickness.

Up to \$290 for HOSPITALIZATION: In addition to above allowances, up to \$290 is paid direct to you for hospital room or a nurse in the home, surgery, X-ray, operating room, anesthesia and laboratory fee, for either accidents or sickness. No conflict with Blue Cross or other group plans.

**BENEFITS PAID
REGARDLESS OF OTHER INCOME**

You receive your benefit payments from The Commercial Travelers regardless of whether you continue to get your regular income and whether you have Blue Cross membership or some other employees' group coverage.

This Association pays benefits direct to members and never prorates claim payments because of other insurance held.

YOU SEND NO MONEY NOW

Mail the coupon below for our FACTS booklet containing easy-to-read information and short blank for applying. If you are accepted at this time, only \$2 will pay for the single accident plan until late September. Currently \$2.50 quarterly thereafter; moderately higher for other plans best combined to suit your needs. Sending the coupon will not obligate you in any way. No solicitor will call.

HUSBAND CHARGED WITH TWO SLAYINGS

WOODGREEN TOTAL STANDS AT \$177.208

Donations pledged or already paid to the Woodgreen Community Centre campaign total \$177,206, it was announced today by E. M. Saunders, chairman of the campaign committee. This includes \$20,000 pledged by industry, but does not include the grant voted by board of control, which promised \$1 for every \$3 contributed privately.

Last night, for the first time since the trailer struck with lightning, a Monday evening, residents were able to put away their candles. Electric power service was restored, first to the greatly handicapped hospitals and then throughout the city as linemen rebuilt two huge towers supporting incoming power lines at the Ontario Hydro Electric distributing station on Walkerton Rd. Throughout yesterday, the city had an almost complete industrial shutdown because of lack of power. Many businesses were forced to close and to climb to their quarters where workers were stalled.

Extended families are competing for burial arrangements for their victim-relatives today. In some cases, the victim's relatives are so distraught that they do not know who for the other or even some of their own relatives.

A funeral has been planned today for the burial of four members of the Helson Jones family. Helson attended said that the Helson family was not even informed when his wife, daughter and two sons were killed.

At the funeral home of the family in Gibbey, seven were at home when the tornado struck. Helson, 14, escaped because he was out of the house. Helson came home from work. "I know nothing about it until I arrived home," he said. "I was in the house and I got of rubble I was so stunned that I do not recall what happened from that time on."

Helson said he was not talking to his brother but I do not even know who it was." His

stopped at her aunt's home on her way from work.

To augment private relief subscriptions that totalled more than \$4,500, Windsor city council voted \$2,500 to the relief fund for those left homeless in suburban areas.

Council also appealed to Detroit police to help regulate traffic headed for the stricken area. London sent two detectives to Windsor and promised "as many more men as we can share and are needed" would be made available.

Along with the suburb of Ojibway, the community of Little Creek took the brunt of the storm. Among those killed was Mrs. Joseph Field who died in the wreckage of her home.

Her grandson, Jackie, 14, outside the house when the wind struck, saved himself by crawling beneath a small bridge and clinging desperately to the beams. Miss McKinley of Tecumseh, likewise escaped when she abandoned her car and sought shelter in a basement.

According to E. K. Laws of Sandwich West, Archie McDougall, who was killed along with his wife, was thrown 100 yards through the air from his home.

SECOND SECTION

First Summer Day, Don't Forget 15,000 Youngsters

MAKING YOUNGSTERS BASE ALL THEIR HOPE ON FUND

Today is the first day of summer, the longest day in the year. Just a week ahead is a bigger day in young Canada's calendar—the end of school and the beginning of the long vacation. For most youngsters it's a time of excited planning of long summer holidays in the country.

Never Seen Country

For most, but not for Larry, Larry has never seen the country; never seen a cow, never shucked off his clothes by the old swimmer hole, never seen apples hanging from a tree. This year, perhaps, he will if The Star Fresh Air Fund gets the \$22,000 it needs to send him and others like him to one of 18 summer camps.

Larry's story is not exceptional, but it is worth telling. It is worth while to recall that in prosperous, fortunate Toronto there are children living in slums, their horizons bounded by sweetening pavements on which they play, that most of us consider our children's birthday is a glittering stream.

Larry is 11, a child of the depression years. He was born on a farm in a self-respecting family where he was the only child. He was a good citizen; he worked at whatever he could find, he belonged to the Reserve army, and he gave his nights and week-ends to train for the country's defence if the need should arise.

Just before the war, Larry's father died. His mother went to work, has been supporting Larry and his younger brother and sister ever since. They are not on relief now, but the mother's earnings are meagre; they provide just enough to eat and a two-room home on a factory street. That is all.

It is not so bad while school is on. The mother can go to her job, knowing that through the day the children are in good hands; they get a hot lunch at school and their play is supervised for most of the time the school is open.

School Over, Worries
But now that school is nearly over, the worries. The youngsters will be out all day. Their playground is the street they live on, where every few minutes the wheels of a truck, or that some driver has come to a stop just in time.

In summer, the baked pavement of that street becomes hot, and combines with the smells of burned tires and factory smoke to provide an atmosphere that saps the strength of the strongest. Children get no fun on that street, pale, listless, thin, their games are poor imitations of the play most young ones enjoy.

For two weeks this summer, if the generosity of Toronto citizens is enough, Larry and some of his playmates can enter a playground of their own, where they can play for two weeks this summer, and then have a small prize for their health and joy of Canada's future citizens.

Send your donation today to The Star Fresh Air Fund at 80 King St. W., Toronto, or leave it personally at the front counter of The Star. What you give will go entirely toward making some child a king for two weeks this summer, and then have a small prize for their health and joy of Canada's future citizens.

tations of the play most young ones enjoy.

For two weeks this summer, if the generosity of Toronto citizens is enough, Larry and some of his playmates can enter a playground of their own, where they can play for two weeks this summer, and then have a small prize for their health and joy of Canada's future citizens.

Send your donation today to The Star Fresh Air Fund at 80 King St. W., Toronto, or leave it personally at the front counter of The Star. What you give will go entirely toward making some child a king for two weeks this summer, and then have a small prize for their health and joy of Canada's future citizens.

WESTERNERS NOT SOVIET OUR GREF, CZECHS SAY

By ROBERT W. KEYSERLING
Abroad S.S. Drottingholm, June 21—(BUP)—Czechoslovakia, the first European country to obtain a Canadian loan, is the economic and political balance wheel of Europe, in grave danger, fighting off the economic and political pressure of the Soviet Union.

Czechoslovakia has complete internal independence, I was told, but the Czechoslovak government probably finds itself in a more delicate position than any other in the precarious game of balancing her independence between Soviet Russia and the west.

Blame Western Powers

"We know that we can survive our independence overnight by showing the least favoritism to the west as against the east," a government informant told me.

"Look at our position today. We want to maintain our independence as a western democratic country, but we are finding it increasingly more difficult—not because of Soviet pressure, but because of western attempts to dictate our internal policy."

"According to the Potsdam agreement Russia was entitled to receive as reparations all German built factories in eastern Europe. This included many of our large industries. Skoda, Zbrojovka (then gun), Cesko-Moravska and a large number of other industries in which the Germans either bought interest or entered through codification of Jewish capital."

"The Germans built probably one of the largest synthetic oil plants at most employing 75,000 workers and producing not only gasoline and by-products, but also manufacturing synthetic rubber, according to J. G. Farber, president, and chairman of the national industry plant, is called throughout Czechoslovakia the Stalin works because it was presented to the state in a special gift written by Marshal Joseph Stalin."

"Partly because of the policy of Russia regarding Czech industry and largely because of the chaotic proprietary conditions due to Germanization of industry, the Czechs are in a desperate financial position. The synthetic plant at most, while officially known as the national industry plant, is called throughout Czechoslovakia the Stalin works because it was presented to the state in a special gift written by Marshal Joseph Stalin."

BORMANN TOO STUPID TO ESCAPE, SHE SAYS

By ROBERT W. KEYSERLING
Aussies want to be sure might of U.S. with them.

Washington, June 21—(BUP)—Australian Foreign Minister Herbert V. Evatt is still trying to get the U.S. to agree to an overall regional defense arrangement for post-war area of Pacific basin.

The U.S. wants to work out a series of bilateral arrangements to obtain post-war rights on certain Pacific islands which it built naval bases during the war.

Key to the discussions with the Australians is the base on the island of Manus in the Admiralty Islands north of New Guinea. Except for several small islands south of the equator over which Britain and the U.S. dispute sovereignty, Manus is the only base on an Allied island which the joint chiefs of staff have recommended for inclusion in the U.S. defense plans.

Evatt had a long discussion on this subject yesterday with President Truman, Acting Secretary of State Dean Acheson and other officials of the state department. He and the president's advisers were reached.

Peter Fraser, New Zealand prime minister, said in a radio broadcast yesterday that New Zealand favors continued control by the U.S. of the islands under United Nations trusteeship.

"New Zealand wants the U.S. to stay in the Pacific," Fraser said. "Evatt is reliably reported to have told an American official that the U.S. should be able to create an overall Pacific defense area with the U.S. to keep this region militarily."

The Australians probably will insist on any agreement on Manus that the Japanese-mandated islands be returned to Japan on record as containing that ratification of the United Nations Charter with its trusteeship provisions is a moral commitment to place all former mandated islands under that system.

The U.S. Congress probably will have different views. Sentiment is strong here for the return of the islands to the Japanese, and the U.S. government is not likely to be so forthcoming in its attitude.

The U.S. government is not likely to be so forthcoming in its attitude. The U.S. government is not likely to be so forthcoming in its attitude. The U.S. government is not likely to be so forthcoming in its attitude.

The U.S. government is not likely to be so forthcoming in its attitude. The U.S. government is not likely to be so forthcoming in its attitude. The U.S. government is not likely to be so forthcoming in its attitude.

The U.S. government is not likely to be so forthcoming in its attitude. The U.S. government is not likely to be so forthcoming in its attitude. The U.S. government is not likely to be so forthcoming in its attitude.
